## Installation Instructions

1. Using your hand, hold End Cap in position on SlatWall panel
2. Using power drill, install self-tapping screw through End Cap and into SlatWall.
  - > to start self-tapping screw, apply pressure to power drill
  - > once self-tapping screw starts threading itself, use light pressure and do not over tighten which will cause the threads to strip
  - > for best results, use a ruler and mark the position of where each screw will go for a consistent appearance
  - > if having trouble with self-tapping screw walking, use a center punch and indent the End Cap first before installing self-tapping screw
3. Repeat for each End Cap

### Helpful Hint!

Remove protective plastic film from End Caps before installation

## CAUTION!

Use gloves and eye protection when using power tools
